Disciplined Alpha Team

Objective

Seeks to outperform the Bloomberg US Long Corporate Index consistently over time with a comparable level of risk

Highlights

- We believe in intense focus on fundamental research-based, relative value investing:
 - Seeks to add value primarily through security selection, aiming to gain an edge through better research and use of market information
 - Seeks to harvest value through continuous rotation to our best opportunities
- Risk management is fundamental to the strategy. We believe:
 - Security selection decisions should be made in a risk-adjusted framework
 - Disciplined duration and curve positioning focuses the investment process
- Source of excess return is primarily from security selection
- Investment universe consists of investment grade credit, US Treasuries, agencies, interest rate futures, CDX, as well as other investments up to 10% in aggregate
- Duration, curve and sector risk are typically managed within a tight range
- Typical portfolio: 200 to 300 issues
- Currency: US dollar only

*Due to rounding, **Sector, Currency, Credit Quality** and **Duration** distribution totals may not equal 100%. This portfolio is actively managed and characteristics are subject to change. **Credit Quality** reflects the highest credit rating assigned to individual holdings of the composite among Moody's, S&P or Fitch; ratings are subject to change. **Cash & Equivalents** reflects unsettled trades, fees and derivatives. Negative **Cash & Equivalents** reflect the market value of future trade commitments for the portfolio. Cash exposure for the Index represents accrued income provided by Bloomberg.*

The Long Corporate Disciplined Alpha Composite includes all discretionary accounts with market values greater than \$40 million managed by Loomis Sayles with investment guidelines that may allow for up to 10% in securities below investment grade with the following additional considerations. The Composite seeks to add value for clients primarily through security selection, intending to gain an edge through analysis and market information and minimizing duration, curve, and large sector mismatches. The investment universe is primarily investment grade corporate bonds, with a bias for liquidity. Portfolio duration is tightly constrained and normally managed within 10% of the benchmark. The Composite inception date is August 1, 2013. The Composite was created in 2013.
